

STATE OF MICHIGAN
IN THE THIRD JUDICIAL CIRCUIT FOR THE COUNTY OF WAYNE
FAMILY DIVISION, DOMESTIC RELATIONS

ADRIENNE MARJORIE ROCKENHAUS,
Plaintiff,

v.

CONRAD ALAN ROCKENHAUS,
Defendant.

Case No. **26-104594-DO**

Hon. **Nicole N. Goodson**

**DEFENDANT'S SUPPLEMENT TO PART ONE OF OMNIBUS THREE-LAYER MOTION
(EVIDENCE PRESERVATION)**

NOW COMES Defendant, **Conrad Alan Rockenhaus**, appearing pro se, and pursuant to MCR 2.310, MCR 2.313, and the Court's inherent authority to preserve the evidentiary record in pending litigation, respectfully submits this Supplement to Part One of his Omnibus Three-Layer Motion (the "Omnibus Motion"), filed in this matter on April 15, 2026 and presently calendared for hearing on June 4, 2026.

This Supplement does not seek new relief beyond the framework already requested in the Omnibus Motion. It expands the categories of evidence subject to the preservation order requested in Part One to include specific digital, account, and surveillance categories that have become evidentiarily significant since the filing of the original Omnibus Motion. In support thereof, Defendant states as follows:

I. RELATIONSHIP TO ORIGINAL OMNIBUS MOTION

1. The Omnibus Motion is incorporated by reference. Part One of the Omnibus Motion identifies eight categories of evidence (Categories A through H) for which preservation is sought under MCR 2.310, MCR 2.313, and the spoliation framework set forth in *Teel v. Meredith*, 284 Mich App 412 (2009).
2. This Supplement adds Categories I through N to the preservation request. The legal authority, the evidentiary foundation, and the relief framework remain as set forth in the Omnibus Motion and are not restated here.
3. The events giving rise to this Supplement are documented in Defendant's Second Supplemental Motion to Modify, Extend, or Terminate Personal Protection Order, filed in Wayne County Case No. 26-102221-PP on May 6, 2026, which is incorporated by reference for its factual content. A copy of that motion accompanies this Supplement as Exhibit 1.

II. SUPPLEMENTAL FACTUAL BASIS

4. Since the filing of the Omnibus Motion on April 15, 2026, the following developments have made specific additional categories of evidence preservation immediately necessary.
5. **Compromise and operation of Defendant's Apple ID and email accounts.** Defendant's Apple ID account, his primary email account at conrad@rockenhaus.com, and his professional email account at conrad@cannabytes.net have remained outside Defendant's control since his federal incarceration period beginning September 4, 2025. These accounts are functional 2FA recovery channels for federal

accounts including Login.gov, ID.me, VA.gov, and CAC.mil. Plaintiff retained operational access to these accounts during Defendant's incarceration and has not relinquished that access.

6. **Compromise and operation of Defendant's Facebook account.** As documented in the Second Supplemental Motion in Case No. 26-102221-PP at paragraphs 8 through 19, an account bearing Defendant's name and likeness on the Facebook social media platform was used on May 4, 2026 to publish a post falsely representing that Defendant was deceased and naming five identified persons, including witnesses material to this proceeding, as responsible for the purported death. Defendant did not author that post, was not deceased on May 4, 2026, and was not in possession of the credentials used to publish the post on that date. The login credentials, login records, and account control records for that account are evidence directly relevant to the claims and defenses in this action.
7. **Operation of an additional Facebook account configured to amplify content adverse to Defendant.** As documented in the Second Supplemental Motion at paragraphs 20 through 28, an account on the Facebook platform bearing the user identifier "Demi-Jo Matthews" shared the May 4, 2026 post into a public Facebook group titled "Michigan Missing Persons Alerts" with framing representing that Defendant had been "missing for at least a month." That account also published a public comment on a photograph posted by Ann Helgren, a witness in this proceeding, with text stating "Is that right before you killed him?" The account is configured to block visibility to Ms. Helgren. The login credentials, login records, IP records, device records, and account-creation records for the "Demi-Jo Matthews" account, to the extent within Plaintiff's possession or control, are evidence directly relevant to the claims and defenses in this action.
8. **Coordinated comment-lockout following amplification.** As further documented in the Second Supplemental Motion, comments on the May 4, 2026 post were locked approximately two hours after the "Demi-Jo Matthews" account amplified the post. The comment-lockout function on the Facebook platform requires control of the originating account, here the account bearing Defendant's name. The technical configuration records demonstrating the time and source of the comment-lockout are evidence directly relevant to the question of who controlled the originating account at the time of the lockout.
9. **AirTag tracking of Defendant's wallet.** Defendant's wallet contains an Apple AirTag tracking device that is registered to Plaintiff's Apple ID account and that has remained in continuous operational status from September 2025 through the filing of this Supplement. Plaintiff has retained continuous location tracking of Defendant's wallet and, by extension, Defendant. The May 4, 2026 post referenced at paragraph 6 above contained a "GPS telemetry" segment purporting to log Defendant's locations over a thirty-two-day period preceding the post. The locations referenced in that telemetry are consistent with the location of Defendant's wallet during the same period. The AirTag tracking history, location records, and Apple ID account records demonstrating the operational status of the tracking are evidence directly relevant to the claims and defenses in this action and to the credibility of representations made in the May 4, 2026 post.

III. SUPPLEMENTAL CATEGORIES OF EVIDENCE TO BE PRESERVED

10. In addition to Categories A through H of Part One of the Omnibus Motion, the following categories of evidence must also be immediately preserved by Plaintiff:

I. Apple ID Account Records

All records, credentials, recovery contacts, recovery keys, login activity logs, device association records, two-factor authentication records, and account-control history associated with the Apple ID account or accounts registered to or operated by Defendant, including any Apple ID account previously associated with Defendant that has been transferred, modified, or assumed by Plaintiff or any other person.

J. conrad@rockenhaus.com Email Account Records

All credentials, content, sent and received messages, draft messages, deleted messages, login activity logs,

IP address records, device association records, two-factor authentication records, mail-forwarding configurations, and account-control history associated with the email account at conrad@rockenhaus.com, from September 1, 2025 through the present.

K. conrad@cannabytes.net Email Account Records

All credentials, content, sent and received messages, draft messages, deleted messages, login activity logs, IP address records, device association records, two-factor authentication records, mail-forwarding configurations, and account-control history associated with the email account at conrad@cannabytes.net, from September 1, 2025 through the present.

L. Facebook Account "Conrad Rockenhaus" Records

All credentials, login activity logs, IP address records, device association records, posting activity records, comment-control settings history, account-recovery records, and account-control history associated with the Facebook account bearing the name "Conrad Rockenhaus," from September 1, 2025 through the present, including but not limited to all records pertaining to the post published on May 4, 2026 referenced in paragraph 6 above and the configuration changes to comments on that post.

M. Facebook Account "Demi-Jo Matthews" Records

All credentials, login activity logs, IP address records, device association records, account-creation records, posting activity records, friend graph data, account-blocking configurations, and account-control history associated with the Facebook account bearing the user identifier "Demi-Jo Matthews," to the extent within Plaintiff's possession or control, from the date of account creation through the present, including but not limited to all records pertaining to the sharing of the May 4, 2026 post into the Facebook group titled "Michigan Missing Persons Alerts" and the comment posted on Ann Helgren's photograph as documented in the Second Supplemental Motion.

N. AirTag and Location Tracking Records

All records associated with any Apple AirTag or other tracking device registered to, operated by, or controlled by Plaintiff that is or has been associated with property, possessions, or personal effects of Defendant, including but not limited to the AirTag contained within Defendant's wallet. Records to be preserved include the device registration records, device pairing history, location ping logs, location history, alert records, and the Apple ID account records demonstrating the operational status of the tracking device, from September 1, 2025 through the present.

IV. AUTHORITY AND BASIS FOR SUPPLEMENTAL PRESERVATION

11. The legal authority for the preservation order requested in this Supplement is the same authority set forth in Part One of the Omnibus Motion: MCR 2.310, MCR 2.313, the Court's inherent authority, and the spoliation framework of *Teel v. Meredith*, 284 Mich App 412 (2009).
12. The categories identified in this Supplement are evidence within the meaning of MCR 2.310 because they bear directly on the claims and defenses in this proceeding, including without limitation the questions of: (a) Plaintiff's continued operational access to and control of Defendant's accounts and digital infrastructure; (b) the authorship and provenance of public communications attributed to Defendant; (c) the credibility of representations made in the public domain regarding Defendant's status, location, and conduct; (d) the existence and operation of surveillance infrastructure directed at Defendant; and (e) the use of digital and platform-based instrumentalities to influence the proceedings or to affect witnesses material to the proceedings.
13. The risk of spoliation as to these categories is concrete and specific. As set forth in paragraph 9 of Part One of the original Omnibus Motion, Plaintiff demonstrated awareness of the evidentiary significance of her digital records by going silent on social media platforms upon retaining counsel. The categories identified in this Supplement are subject to deletion, modification, transfer, or other forms of spoliation by

Plaintiff or by any person acting at her direction at any time absent a preservation order. Once deleted from the controlling platforms, these records cannot be reliably reconstructed.

14. The categories identified in this Supplement do not duplicate Categories A through H of the original Omnibus Motion. Category B of the original motion addresses digital and electronic evidence in general terms; this Supplement identifies specific accounts, specific platforms, and specific records that have become evidentiarily significant since the original filing and that are not adequately captured by the general framing of Category B.

V. RELIEF REQUESTED

WHEREFORE, Defendant **Conrad Alan Rockenhaus** respectfully requests that this Honorable Court enter an Order:

15. Granting the relief requested in Part One of the original Omnibus Motion;
16. Expanding the preservation order to include Categories I, J, K, L, M, and N as set forth in Section III of this Supplement;
17. Requiring Plaintiff to immediately preserve, and refrain from altering, deleting, destroying, concealing, transferring, or modifying access to, all records, credentials, content, and account-control history identified in Categories I, J, K, L, M, and N;
18. Providing that any alteration, deletion, destruction, concealment, transfer, or modification of access to evidence subject to this Order shall constitute contempt of court and may result in sanctions and adverse inference instructions at trial; and
19. Granting such other and further relief as this Court deems just and equitable.

Respectfully submitted,

/s/ Conrad A. Rockenhaus

Conrad Alan Rockenhaus, Defendant Pro Se
