

STATE OF MICHIGAN
IN THE THIRD JUDICIAL CIRCUIT FOR THE COUNTY OF WAYNE
FAMILY DIVISION, DOMESTIC RELATIONS

ADRIENNE MARJORIE ROCKENHAUS,
Plaintiff/Counter-Defendant,

v.

CONRAD ALAN ROCKENHAUS,
Defendant/Counter-Plaintiff.

Case No. **26-104594-DO**

Hon. **Nicole N. Goodson**

**DEFENDANT/COUNTER-PLAINTIFF'S SUPPLEMENTAL BRIEF IN SUPPORT OF
PENDING EMERGENCY MOTION FOR PRESERVATION ORDER AND ORDER
PROHIBITING SPOILIATION OF EVIDENCE**

I. INTRODUCTION

1. Defendant/Counter-Plaintiff Conrad Alan Rockenhaus, pro se, files this Supplemental Brief in support of his Emergency Motion for Preservation Order and Order Prohibiting Spoliation of Evidence (the "Pending Motion"), filed May 13, 2026. This Brief seeks no new or expanded relief. The relief already requested in the Pending Motion, including preservation directives addressed to X Corp. for the named X-platform accounts (including the @rosebuttcheeks account), Meta Platforms, Inc. (including Facebook and Threads), and Google LLC (including the email account ecigaretteslut@gmail.com), is the relief sought.
2. This Brief is filed solely to place before the Court four supplemental evidentiary findings developed by Defendant/Counter-Plaintiff on May 14, 2026 that strengthen the inferential basis on which the Pending Motion already rests. The findings are: (a) the cessation of publicly-attributable X-platform activity by the twelve previously-monitored X-network accounts since May 9, 2026, together with the documentary attribution of the @rosebuttcheeks account (already named in the Pending Motion) as a private-identity X account operated by Plaintiff/Counter-Defendant Adrienne Marjorie Rockenhaus and continuing to post throughout the relevant period; (b) a temporal synchronization at three-minute resolution on May 9, 2026 between an electronic mail message sent to Witness Ann Helgren and an X-platform reply by the account @spuntpatrol; (c) the identification of @BiancaWestfall as a previously-undocumented operational amplifier of the coordinated case-narrative content with a five-month history of such activity, including the publication of original content targeting Defendant/Counter-Plaintiff's federal-court attorney; and (d) the operational migration of the coordinated activity from publicly-attributable X accounts to Meta-owned platforms and email channels while continuing under cover of the @rosebuttcheeks private-identity account.
3. The chain of custody, capture methodology, and SHA-256 hash manifest for the public-record X scrape datasets supporting the findings stated in this Brief are set forth in the Second Chain of Custody Supplement and the Third Chain of Custody Supplement, both filed contemporaneously herewith.

II. PROCEDURAL POSTURE

4. On May 13, 2026, Defendant/Counter-Plaintiff filed the Pending Motion together with the Chain of Custody Supplement supporting the May 12, 2026 Scrape Evidence (the "First Supplement"). Both filings were accepted through the Third Judicial Circuit Court Applications (CCApps) filing system on the same

date.

5. By Order entered May 14, 2026, this Honorable Court denied the emergency framing of the Pending Motion while leaving the Pending Motion alive on the regular motion docket pending submission of an ePraecipe for non-emergency hearing under Zoom. Defendant/Counter-Plaintiff submitted the required ePraecipe on May 14, 2026 at approximately 16:45 UTC.
6. On May 14, 2026, between approximately 22:02 UTC and 22:42 UTC, Defendant/Counter-Plaintiff captured additional public-record X-platform scrape datasets covering the period from May 12, 2026 forward and discrete historical conversation trees (collectively, the "May 14, 2026 Scrape Evidence"). The capture methodology and the SHA-256 hash manifest for the May 14, 2026 Scrape Evidence are set forth in the Second Chain of Custody Supplement and the Third Chain of Custody Supplement, both filed contemporaneously herewith. This Brief is submitted in support of the Pending Motion now on the regular docket, and presents the analytical findings supported by the May 14, 2026 Scrape Evidence for this Honorable Court's consideration in connection with its ruling on the Pending Motion.

III. SUPPLEMENTAL EVIDENTIARY FINDINGS

A. Cessation of publicly-attributable X-platform activity, and documentary attribution of the @rosebuttcheeks account already named in the Pending Motion

7. The May 14, 2026 Scrape Evidence establishes that none of the twelve X-network accounts identified in the First Supplement and preserved in the May 12, 2026 Scrape Evidence has posted any new tweet on the X platform between May 12, 2026 and May 14, 2026. Across the full sample returned by the multi-handle query, the latest activity by any of the twelve accounts is set forth in the following table. Each entry reflects the most recent activity on the X platform by the named account up to the capture time of approximately 22:02 UTC on May 14, 2026.

Account	Last activity (UTC)
@spuntpatrol	Sat May 09, 2026 18:51
@adezero	Sat Apr 11, 2026 19:43
@4chantress	Sun Apr 05, 2026 15:27
@p1ratech	Wed Apr 01, 2026 09:35
@phataadvert	Sun Mar 29, 2026 23:09
@LeighCheri_	Sat Mar 28, 2026 12:55
@alg0queen	Mon Mar 23, 2026 02:11
@LuceMargarita	Wed Mar 18, 2026 14:06
@PunkyHomegirl	Wed Mar 18, 2026 14:07
@blackjakkkk	Wed Mar 18, 2026 05:54
@AllysonClermont	Wed Mar 18, 2026 00:59
@picklepickleg	Tue Mar 17, 2026 16:15

8. The May 14, 2026 Scrape Evidence further establishes that no new replies have been posted to the May 8, 2026 "Dead Man's Switch" broadcast conversation tree since the May 12, 2026 capture, and that no third-party X account has posted any reply or mention directed to @spuntpatrol or @adezero since May 12, 2026.
9. The May 9, 2026 last-activity timestamp for @spuntpatrol, the operational anchor account of the X-network coordinated activity preserved in the May 12, 2026 Scrape Evidence, is significant. May 9, 2026 was the same day on which: (a) Plaintiff/Counter-Defendant vacated her residence at 26695 Ross Drive, Redford Township, Michigan, as documented in the Amended Counterclaim §XIII ¶88 and the Comprehensive Witness Affidavit of Ann Helgren executed contemporaneously with this filing; (b) Witness Ann Helgren received two harassment emails from the ecigaretteslut@gmail.com / "Angeline M"

sender as described in §III.B below; and (c) the @spuntpatrol account posted the "He's dead" reply to the Dead Man's Switch conversation tree, as described in §III.B below.

10. The foregoing cessation of publicly-attributable X-platform activity is, however, not equivalent to cessation of personal X-platform activity by Plaintiff/Counter-Defendant Adrienne Marjorie Rockenhaus. The May 14, 2026 Scrape Evidence further establishes that the @rosebuttcheeks account, separately named in the Pending Motion's account list, has continued to post on the X platform throughout the relevant period. The most recent @rosebuttcheeks activity captured in the May 14, 2026 Scrape Evidence is dated May 14, 2026 at 21:28 UTC, approximately thirteen minutes before capture completion. The @rosebuttcheeks account profile identifies the account holder as "Rosemary" located in Pennsylvania, with sixty-three followers and a bio describing the account's stated content focus as "Reading, Anime, Gaming, Wrestling, Drama Content." The account was created on December 26, 2020. Its activity volume by month in the period preceding capture is set forth in the following table:

Month (2026)	@rosebuttcheeks tweet count
January	43
February	54
March	59
April	128
May (through capture date)	59

The 2026 monthly volumes materially exceed the account's prior-year baseline.

11. The documentary attribution evidence establishing that the @rosebuttcheeks account is operated by Plaintiff/Counter-Defendant Adrienne Marjorie Rockenhaus consists of a publicly observable three-tweet thread on the X platform that is independently verifiable from X Corp.'s public records:

Tweet ID	Date (UTC)	Account	Tweet text (verbatim)	Reply target (in_reply_to_username field)
2043052376794276350	Apr 11, 2026 19:43	@adezero	"I am hurting so bad today"	(none, originating post)
2046333254677012694	Apr 20, 2026 21:00	@rosebuttcheeks	"@adezero Are you okay?"	@adezero
2047968608601432411	Apr 25, 2026 09:19	@rosebuttcheeks	"@adezero ???"	@rosebuttcheeks

12. The third tweet in the foregoing table, tweet identifier 2047968608601432411, has an in_reply_to_username value of @rosebuttcheeks. Although the tweet text begins with the @-mention "@adezero" (auto-prefilled by the X platform user interface based on the prior tweet in the reply chain), the structural reply target of the tweet, as recorded in the X platform's internal reply-tree metadata, is @rosebuttcheeks's own prior reply (tweet identifier 2046333254677012694). The third tweet thus represents @rosebuttcheeks bumping her own prior "Are you okay?" message with a follow-up "???" because @adezero, the account she was waiting for a response from, had not yet replied.
13. The only operationally coherent explanation for the foregoing structural feature of the public X record is that the same operator was logged into the @rosebuttcheeks account on April 25, 2026 at 09:19 UTC, was looking at the thread from the @rosebuttcheeks perspective, and posted the "???" follow-up because, from that perspective, @adezero had failed to respond to @rosebuttcheeks's expression of concern. From inside the @rosebuttcheeks account, the operator could not see, because she herself was @adezero and had not switched accounts to type a response, that the reason @adezero had not responded was that she herself was @adezero. The self-reply "???" is the operator's own confusion that her own account had not responded to her own other account. The attribution does not depend on

personal knowledge by Defendant/Counter-Plaintiff. The attribution is established by the public X-platform record itself and is independently verifiable by any party retrieving the conversation tree at conversation identifier 2043052376794276350 from X Corp.'s public records or from any third-party preservation source.

14. The May 14, 2026 Scrape Evidence further establishes two corroborating retweets by the @rosebuttcheeks account of content authored by @adezero and @spuntpatrol respectively:

Date (UTC)	@rosebuttcheeks activity
Mar 16, 2026 19:11	RT @adezero "Update on Conrad and me: [link]"
May 12, 2026 11:36	RT @spuntpatrol "Conrad Rockenhaus just posted a dead man's switch 3 days ago..." (the May 8, 2026 Dead Man's Switch broadcast tweet)

The May 12, 2026 retweet is significant for an additional reason: it constitutes amplification by the @rosebuttcheeks account of the originating Dead Man's Switch broadcast tweet at the precise moment the publicly-attributable accounts were ceasing X-platform activity. The amplification has remained on the @rosebuttcheeks timeline continuously since May 12, 2026 and is preserved in the May 14, 2026 Scrape Evidence.

15. Read together, the foregoing findings establish that the cessation of X-platform activity by the twelve publicly-attributable accounts identified in paragraph 7 above is not a cessation of the coordinated X-platform activity by the operator herself. The same operator has continued personal X-platform activity throughout the relevant period via the @rosebuttcheeks account, including amplification of the May 8, 2026 Dead Man's Switch broadcast at the precise moment the publicly-attributable accounts were ceasing X activity. The pattern is most consistent with a deliberate operational decision to perform public cessation on attributable accounts while preserving continued operator activity from a private-identity account, rather than with cessation of the underlying coordinated operation.

B. May 9, 2026 cross-platform temporal synchronization at three-minute resolution

16. Comparison of the May 14, 2026 Scrape Evidence with the documentary record of two electronic mail messages received by Witness Ann Helgren at her personal email account on the morning of May 9, 2026 from the email address ecigaretteslut@gmail.com displayed under the sender name "Angeline M" reveals a temporal synchronization at three-minute resolution between an email harassment communication and an X-platform reply.
17. The two emails received by Witness Helgren on May 9, 2026 are authenticated by her contemporaneously executed Comprehensive Witness Affidavit at paragraph 21 thereof. The first email, received at approximately 09:31 UTC on May 9, 2026 (05:31 AM EDT), contained subject content concerning the alleged death of Defendant/Counter-Plaintiff. The second email, received at approximately 10:06 UTC on May 9, 2026 (06:06 AM EDT), contained content asserting that Witness Helgren had "left him to burn and rot." The sender name "Angeline M" is the first and middle name of Witness Helgren's adult daughter, Angeline Marie, and Plaintiff/Counter-Defendant is personally aware of these names through her longstanding personal friendship with Witness Helgren.
18. At approximately 10:09:22 UTC on May 9, 2026 (06:09:22 AM EDT), the @spuntpatrol account posted a reply within the "Dead Man's Switch" conversation tree at tweet identifier 2053054715122888881 reading verbatim: "*@lordofsinatra @KiwiFarmsDotNet He's dead.*" The reply text is preserved in the May 14, 2026 Scrape Evidence and is byte-for-byte identical to the text returned from X Corp. via the Apify capture.
19. The synchronization between these three communications is summarized as follows:

UTC Time	EDT Time Platform	Communication
-------------	-------------------	---------------

09:31:00	05:31:00	Gmail	First ecigaretteslut@gmail.com email to Witness Helgren
	AM		
10:06:00	06:06:00	Gmail	Second ecigaretteslut@gmail.com email to Witness Helgren ("left him to burn and rot")
	AM		
10:09:22	06:09:22	X	@spuntpatrol reply in DMS conversation tree ("He's dead.")
	AM		

20. The @spuntpatrol reply was posted three minutes and twenty-two seconds after the second ecigaretteslut@gmail.com email to Witness Helgren. Both communications advance the same factual assertion (that Defendant/Counter-Plaintiff is deceased) across two different communication platforms (Google email and X) on the same calendar day, in temporal proximity that is materially inconsistent with independent action by two separate uncoordinated actors. The synchronization is offered for two evidentiary purposes: (a) to support the inference that the @spuntpatrol account operator and the ecigaretteslut@gmail.com sender are either the same operator or are operating in real-time coordination; and (b) to support the inference that the witness-targeting operation is centrally directed, contradicting any account in which the X-network harassment, the email harassment, and the related Facebook activity have independent origins.
21. The synchronization further establishes that the operators of the coordinated activity have specific personal knowledge of Witness Helgren's family relationships, including the first and middle name of her adult daughter, that has been disclosed to Plaintiff/Counter-Defendant Adrienne Marjorie Rockenhaus through Witness Helgren's longstanding personal friendship with her. This forecloses, on the existing record, any inference that the synchronized harassment activity originated outside the network of persons in informational contact with Plaintiff/Counter-Defendant.

C. Identification of @BiancaWestfall as a previously-undocumented operational amplifier

22. The First Supplement and the May 12, 2026 Scrape Evidence identified twelve X-platform accounts as the principal nodes of the coordinated case-narrative amplification network. The reply tree of the May 8, 2026 "Dead Man's Switch" broadcast, preserved in the May 12, 2026 Scrape Evidence, included a reply at 22:08:24 UTC on May 8, 2026 from the account @BiancaWestfall reading "wtffffff" in apparent reaction to the broadcast. At the time of the May 13, 2026 filings, the @BiancaWestfall account was not yet identified as a member of the coordinated amplification network and the May 8, 2026 reply was treated as an isolated bystander reaction.
23. The May 14, 2026 Scrape Evidence establishes that this characterization is incorrect. The complete @BiancaWestfall timeline returned by the May 14, 2026 capture establishes a sustained five-month pattern of amplification of @adezero and related case-narrative content, including the following:

Date (UTC)	Account activity
Jan 07, 2026 06:18	RT @adezero
Jan 08, 2026 16:15	Original post: "Lakin Logjam: How Attorney Marc Lakin Exploited a Disabled Veteran's TBI - Conrad Rockenhaus Tragedy" with attached link
Jan 12, 2026 05:07	Original post: "AUDIO EVIDENCE: Disabled Veteran, Conrad Rockenhaus, Calls from FCI Milan SHU, Names 'Neo-Nazi' Guards, Exposes Violence, Chemical Restraint, Medical Neglect" with attached link
Jan 12, 2026 05:08	Two RTs of @adezero in immediate sequence
Feb 24, 2026 13:34	Three RTs of @adezero in the "delete him" sequence concerning Defendant/Counter-Plaintiff to 13:40
Mar 18,	RT @adezero

2026 15:03 RT @adezero

May 08,

2026 RT of @spuntpatrol "Dead Man's Switch" broadcast tweet

22:08:18

May 08,

2026 Reply to "Dead Man's Switch" broadcast: "wtffffff"

22:08:24

24. Two features of the @BiancaWestfall activity record are dispositive of the operational-amplifier characterization. First, the @BiancaWestfall account has authored at least two original posts (not retweets) advancing case-narrative content targeting Defendant/Counter-Plaintiff and Defendant/Counter-Plaintiff's federal-court attorney by name. The January 8, 2026 post characterizing Defendant/Counter-Plaintiff's federal-court attorney Marc Lakin as exploitative of Defendant/Counter-Plaintiff's traumatic brain injury is a coordinated hostile act against an attorney-client relationship, undertaken contemporaneously with the federal proceedings against Defendant/Counter-Plaintiff in the United States District Court for the Eastern District of Michigan. The January 12, 2026 "AUDIO EVIDENCE" post identifying FCI Milan correctional officers as "Neo-Nazi" by job category is materially similar in language and substance to the originating January 7, 2026 @adezero tweet preserved separately in the May 14, 2026 Scrape Evidence.
25. Second, the @BiancaWestfall account ceased X-platform activity on May 8, 2026 at 22:08 UTC and has posted no new content on the X platform through the May 14, 2026 capture, matching the operational-cessation pattern of the twelve previously identified network accounts described in §III.A above. The simultaneous cessation across all thirteen accounts (the twelve identified in §III.A plus @BiancaWestfall) on or around May 8 to 9, 2026 is materially inconsistent with thirteen independent operators making independent decisions to disengage.
26. The relevance of this finding to the relief already requested in the Pending Motion is direct. The Pending Motion seeks preservation directives addressed to X Corp. covering accounts identified as constituting the coordinated amplification network. The @BiancaWestfall account is, on the supplemented record now before the Court, a member of that network and should be expressly within the scope of the X Corp. preservation directive when entered.

D. Operational migration to Meta-owned platforms and email channels

27. The cessation of publicly-attributable X-platform activity documented in §III.A above, taken together with the continuation of @rosebuttcheeks activity throughout the relevant period, does not signal cessation of the coordinated witness-intimidation activity. To the contrary, between May 9, 2026 and the date of this filing, the coordinated activity has continued on platforms other than X and on platforms ancillary to X. The pattern is set forth in the following table:

Date (2026)	Platform	Event
May 4	Facebook (Meta)	"Dead Man's Switch" post published from Defendant/Counter-Plaintiff's compromised Facebook account naming five persons including Witness Ann Helgren and Witness Pamela Jordan
May 5 to 6	Facebook (Meta)	"Demi-Jo Matthews" account commented on Witness Helgren's April 24, 2026 photograph ("Is that right before you killed him?"); shared the May 4, 2026 "Dead Man's Switch" post into the 1,700-member "Michigan Missing Persons Alerts" Facebook group
May 9 (morning)	Gmail	Two ecigaretteslut@gmail.com / "Angeline M" emails to Witness Helgren as identified in §III.B above

May 9 (X)	X	@spuntpatrol activity, including the "He's dead" reply identified in §III.B above
May 9 forward	X	Cessation of activity across all thirteen publicly-attributable network accounts
May 12 (X)	X	@rosebuttcheeks RT of the May 8, 2026 "Dead Man's Switch" broadcast
May 14 (X)	X	@rosebuttcheeks continuing activity through 21:28 UTC
May 14 (morning)	Threads (Meta)	Threads platform contact attempt to Witness Helgren from an account presenting Defendant/Counter-Plaintiff's name and image, in the form of a Threads friend request, made without Defendant/Counter-Plaintiff's authorization

28. The pattern is consistent with operational awareness of the public-record scraping and litigation-preservation posture of the X-platform evidence preserved in the First Supplement, and consistent with a deliberate migration of the publicly-coordinated component of the activity to communication platforms with weaker public scraping infrastructure or to direct one-to-one communication channels (Gmail, Threads direct contact), while the operator herself has retained personal X-platform activity through the @rosebuttcheeks account. The continued cross-platform activity establishes that the underlying coordinated operation has not ceased; rather, it has bifurcated into (i) public X-platform silence from attributable accounts, (ii) continued private-identity X-platform activity from @rosebuttcheeks, and (iii) active operations on Meta platforms and email channels.

IV. SIGNIFICANCE TO THE PENDING MOTION

29. The Pending Motion requests preservation directives addressed to X Corp. (covering the named X accounts including @rosebuttcheeks), Meta Platforms, Inc. (including Facebook and Threads), and Google LLC (including the email account ecigaretteslut@gmail.com), among other targets. The four findings developed in §III above strengthen the inferential basis for each component of the relief already requested in the Pending Motion.
30. **As to the X Corp. preservation directive:** The cessation finding combined with the @rosebuttcheeks documentary-attribution finding (§III.A) demonstrates that the operator of the coordinated network is operationally sophisticated, is aware of the litigation-preservation posture, and has implemented a private-identity continuity architecture under cover of which case-narrative activity continues. The continued posting from the @rosebuttcheeks account during the same period that the publicly-attributable accounts have gone silent is a contemporaneous demonstrated risk that operator-attributable X-platform evidence will be deleted, account-disabled, or migrated to additional concealed accounts absent immediate preservation. The @BiancaWestfall finding (§III.C) materially expands the scope of accounts requiring X Corp. preservation to include an account whose existing posts include original-content hostile-act posts targeting Defendant/Counter-Plaintiff's federal-court attorney and identifying federal correctional officers as "Neo-Nazi."
31. **As to the Meta Platforms preservation directive:** The operational migration finding (§III.D) demonstrates active and continuing witness-targeting activity on Facebook (the "Demi-Jo Matthews" account; the "Dead Man's Switch" post; the Michigan Missing Persons Alerts group share) and on Threads (the May 14, 2026 morning friend-request contact to Witness Helgren). Each of these is an ongoing operational use of a Meta platform during the period between filing of the Pending Motion and ruling on the Pending Motion, creating an elevated and continuing risk of spoliation absent preservation.
32. **As to the Google LLC preservation directive:** The cross-platform synchronization finding (§III.B) directly implicates the ecigaretteslut@gmail.com account in coordinated witness-intimidation activity timed to within three minutes and twenty-two seconds of the X-platform "He's dead" reply by @spuntpatrol. Operator-level metadata on the ecigaretteslut@gmail.com account, including login IP

addresses, account-recovery contact methods, and Google service usage patterns, is essential to identification of the operator and is at material risk of deletion or alteration absent preservation. Google LLC retention policies for free Gmail accounts and the absence of any service-of-process obligations in the absence of a preservation directive give rise to specific and present risk of evidence loss.

33. **As to the inferential basis for the entire requested relief:** The findings of §III.A through §III.D, read together, establish that the coordinated witness-intimidation activity is presently ongoing; that the operator has implemented a deliberate operational architecture under which publicly-attributable accounts are silent while private-identity activity continues; that the activity has expanded across at least three distinct technical platforms operated by three distinct service providers; and that the operators have demonstrated operational awareness of the preservation posture by ceasing only the most publicly observable component of the activity on the day immediately following the most intense documented coordination event (May 9, 2026). The risk of evidence loss is not speculative but is supported by the operators' own demonstrated pattern of platform-by-platform migration as preservation posture is established.

V. CONCLUSION

34. Defendant/Counter-Plaintiff respectfully requests that this Honorable Court consider the supplemental evidentiary findings set forth in this Brief, together with the May 14, 2026 Scrape Evidence and SHA-256 manifest set forth in the Second Chain of Custody Supplement filed contemporaneously herewith, when ruling on the Pending Motion now on the regular motion docket. This Brief seeks no new or expanded relief beyond that already requested in the Pending Motion.

Respectfully submitted,

Conrad Alan Rockenhaus

Defendant/Counter-Plaintiff, pro se
