

STATE OF MICHIGAN
IN THE THIRD JUDICIAL CIRCUIT FOR THE COUNTY OF WAYNE
FAMILY DIVISION, DOMESTIC RELATIONS

ADRIENNE MARJORIE ROCKENHAUS,
Plaintiff/Counter-Defendant,

v.

CONRAD ALAN ROCKENHAUS,
Defendant/Counter-Plaintiff.

Case No. **26-104594-DO**

Hon. **Nicole N. Goodson**

**DEFENDANT/COUNTER-PLAINTIFF'S THIRD SUPPLEMENT TO
OMNIBUS MOTION PART ONE (PRESERVATION OF EVIDENCE),
CONCERNING APPLE AIRTAG CYBERSTALKING, COMPROMISED
ICLOUD ACCOUNT, AND CROSS-PLATFORM WITNESS-INTIMIDATION
INFRASTRUCTURE**

NOW COMES Defendant/Counter-Plaintiff Conrad Alan Rockenhaus, appearing pro se, and respectfully submits this Third Supplement to Part One (Preservation of Evidence) of the Omnibus Motion previously filed in this matter, pursuant to MCR 2.310, MCR 2.302, and the Court's inherent equitable authority. In support, Defendant/Counter-Plaintiff states as follows.

LCR 2.119(B) COMPLIANCE

1. The undersigned hereby certifies, pursuant to LCR 2.119(B)(1), that he has complied with all provisions of LCR 2.119(B) on motion practice. This Supplement adds preservation categories to a previously-filed motion that already requested concurrence under LCR 2.119(B)(2); the present Supplement is procedurally an extension of that earlier filing and is necessary to present in light of the factual developments set forth in Section II below.

**I. RELATIONSHIP TO ORIGINAL OMNIBUS MOTION AND PRIOR
SUPPLEMENTS**

2. Defendant/Counter-Plaintiff filed his Omnibus Motion for Order to Preserve Evidence, Financial Disclosure and Accounting, and Emergency TRO Regarding Premarital Domain rockenhaus.com on April 16, 2026 ("Original Omnibus"). Part One of the Original Omnibus requested entry of a Preservation Order covering Categories A through H, supported by *Teel v. Meredith*, 284 Mich. App. 412 (2009).
3. On May 5, 2026, Defendant/Counter-Plaintiff filed a Supplement to the Original Omnibus concerning Part Three (rockenhaus.com premarital domain) ("Part Three Supplement").
4. On May 6, 2026, Defendant/Counter-Plaintiff filed a First Supplement to Part One of the Original Omnibus expanding the preservation categories.
5. On May 10-11, 2026, Defendant/Counter-Plaintiff filed a Second Supplement to Part One of the Original Omnibus, adding Categories O through T concerning the vacation of the marital residence by Plaintiff/Counter-Defendant on May 9, 2026, the sockpuppet-

coordination evidence surfacing on X (formerly Twitter), the email-harassment evidence directed at Defendant's witness Ann Helgren, and the cross-platform amplification of the May 4, 2026 "Dead Man's Switch" Facebook post.

6. This Third Supplement to Part One adds five additional preservation categories, U through Y, addressing a discrete subject matter that has crystallized since the Second Supplement was filed: the Apple AirTag tracking device Defendant placed in his own wallet pre-incarceration as a personal security measure, the conrad@cannabytes.net iCloud account that Defendant originally created and operated and to which the AirTag was paired but to which Defendant no longer has access, the conversion of that device-pairing relationship into a surveillance vector against Defendant through Plaintiff/Counter-Defendant's unauthorized access to the iCloud account during and after Defendant's federal incarceration, and the cross-platform witness-intimidation infrastructure that has been operated using the data product of that surveillance vector.
7. This Third Supplement is filed in addition to, and is not in lieu of, Defendant's contemporaneously filed Emergency Motion for Preservation Order and Order Prohibiting Spoliation of Evidence. The Emergency Motion seeks injunction-track relief on a time-sensitive basis under MCR 3.310. This Third Supplement seeks discovery-track preservation relief under MCR 2.310 in the context of the Original Omnibus already pending before this Court. The two filings are complementary; the relief is differently grounded and differently scoped.

II. FACTUAL BASIS

A. The Apple AirTag and the Compromised iCloud Account, Chain of Custody

8. On dates prior to his September 2025 federal incarceration, Defendant owned an Apple AirTag tracking device and a wallet of a design intended to accommodate such a device. Defendant placed the AirTag in the wallet and paired the AirTag to an iCloud account that he then owned and operated at conrad@cannabytes.net. The arrangement was Defendant's own pre-incarceration security measure for his personal wallet, of the kind for which the AirTag product is commonly marketed.
9. During the period of Defendant's federal incarceration from approximately September 2025 through March 2, 2026, Defendant did not have access to his iPhone, to his iCloud account at conrad@cannabytes.net, or to the wallet. During this same period, Plaintiff/Counter-Defendant retained physical custody of the wallet and exercised administrative control over the cannabytes.net domain through which Defendant's iCloud account at conrad@cannabytes.net was hosted.
10. Defendant's access to the conrad@cannabytes.net iCloud account was terminated at some point during the incarceration period. As of the date of Defendant's release on March 2, 2026, and continuing to the date of this Supplement, Defendant does not have, and Plaintiff/Counter-Defendant has not restored, Defendant's access to the conrad@cannabytes.net iCloud account. On information and belief, Plaintiff/Counter-Defendant has continuing administrative access to that iCloud account through her control of the cannabytes.net domain, and has operated it without Defendant's authorization since the loss of his access.
11. On or about March 2, 2026, Plaintiff/Counter-Defendant returned to Defendant the wallet she had retained during his incarceration, with the AirTag still inside. The AirTag at that point was paired to and continued to report location to the conrad@cannabytes.net iCloud account, which Defendant could no longer access and which Plaintiff/Counter-Defendant could. The device-pairing that had been Defendant's pre-incarceration security measure

for his own wallet had been converted, by the change in iCloud-account access during the incarceration period, into a surveillance vector operating against Defendant.

12. From March 2, 2026, forward, the AirTag operated continuously in proximity to Defendant. Because Defendant's iPhone was logged in to an iCloud account other than conrad@cannabytes.net, specifically an iCloud account to which Defendant had retained his own access, Defendant's iPhone treated the AirTag as an unidentified accessory traveling with the device. Apple's integrated anti-stalking notification feature, which alerts users when an unknown Bluetooth tracker is moving with them over time, generated Apple-system notifications to Defendant's iPhone bearing text reading "Unknown Accessory Detected" or substantially equivalent text. Those alerts, contemporaneously generated by Apple's anti-stalking infrastructure on Defendant's own device, are the Apple-system record that Defendant was the subject of AirTag surveillance traceable to an account Defendant had originally created but to which he no longer had access.
13. Defendant's witness Ann Helgren has likewise preserved on her personal Apple iPhone notifications generated by the Apple Find My anti-stalking network during periods in which Ms. Helgren was traveling in proximity to Defendant. Ms. Helgren's notifications corroborate the AirTag's continuous operation and movement with Defendant during the relevant period from an independent third-party device.
14. The implementation of countermeasures and the confirmation of the surveillance hypothesis are documented as follows:
 - a. Upon recognizing the surveillance vector through the Apple anti-stalking alerts received on his iPhone, Defendant implemented a sequence of countermeasures designed to interrupt active tracking, to test the surveillance hypothesis under controlled conditions, and to preserve the physical evidence intact.
 - b. From on or about March 16, 2026 through on or about April 1, 2026, a period of approximately sixteen days, Defendant transferred custody of the wallet, with the AirTag still inside, to his witness Ann Helgren. Ms. Helgren held the device at her own residence during a period in which Defendant was residing at the Delonis Center, a temporary-shelter facility in Ann Arbor, Michigan. The Helgren custody window operated both as a removal of the AirTag from Defendant's own daily movements and as a forensic test of whether Plaintiff/Counter-Defendant had ongoing visibility into the wallet's location, since during the Helgren custody window the wallet was substantially stationary at Ms. Helgren's residence while Defendant himself was at the Delonis Center and elsewhere.
 - c. On or about March 30 and March 31, 2026, in the closing days of the Helgren custody window, a Facebook account operating under the name "Sherri Adair" posted on Ms. Helgren's Facebook account a series of accusations against Ms. Helgren, asserting in pertinent part that Ms. Helgren had "force[d] your way into [Plaintiff/Counter-Defendant's] house," had "g[one] to the house of a rape victim to mock her," and had "put[] threatening notes on her car and her door." A second Facebook account operating under the name "Jenn Reede" replied to the Sherri Adair comment with text stating: "The police can't find her rapist friend I wonder if she's hiding him at her house." Ms. Helgren publicly responded to the Sherri Adair comment with text identifying the Sherri Adair account as operationally controlled by Plaintiff/Counter-Defendant, specifically: "Hahaha you don't think I know this is another one of your split personalities Ms Adrienne Blair." Ms. Helgren's response is a contemporaneous third-party public-record identification of the Sherri Adair Facebook account as operated by Plaintiff/Counter-Defendant under an alias of her former and reverted-to surname.
 - d. The Jenn Reede comment's location-specific assertion that Defendant was being hidden at

Ms. Helgren's house was an inference that was substantially accurate as to the location of the wallet during the Helgren custody window (because the wallet, with the AirTag, was at Ms. Helgren's residence) but was not publicly observable in any conventional sense, because Defendant himself was residing at the Delonis Center in Ann Arbor, not at Ms. Helgren's residence. The assertion was knowable, on the record before Defendant, only to a person with access to the location-history dataset that the AirTag was transmitting to the conrad@cannabytes.net iCloud account. The March 30 to March 31, 2026 Facebook posts therefore (i) confirmed for Defendant and Ms. Helgren the surveillance hypothesis on which the Helgren custody window had been operating, (ii) operationally publicized the surveillance product to a broader Facebook audience under cover of false-criminal-allegation framing, and (iii) constituted, by Ms. Helgren's public-record identification, a contemporaneous third-party attribution of the Sherri Adair Facebook account to Plaintiff/Counter-Defendant.

e. On or about April 1, 2026, in response to the surveillance confirmation produced by the March 30 to March 31, 2026 Facebook posts, Defendant resumed custody of the wallet from Ms. Helgren. Defendant subsequently placed the wallet, with the AirTag still inside, in the trunk of an automobile then owned by Defendant. Defendant had purchased the automobile from Brian Howell prior to that date, Mr. Howell being the affiant whose sworn testimony appears as Exhibit 12 in Wayne PPO 26-102221-PP. Defendant thereafter transferred the wallet, with the AirTag still inside, to the residence of DeAndre Connor, the affiant whose sworn testimony appears as Exhibit 17 in Wayne PPO 26-102221-PP, where the wallet has remained. Each of these relocations served the dual purpose of (i) interrupting active surveillance of Defendant's residential and travel locations and (ii) preserving the physical evidence (the AirTag, the wallet, and the device-pairing relationship) intact in a stable third-party location pending determination of the appropriate forensic protocol.

B. The Compromised iCloud Account and Apple-Held Records

15. Apple, Inc. maintains records associated with the iCloud account at conrad@cannabytes.net that, if preserved, would establish the chain of custody for the AirTag's operation and the identity of the operator. Those records include but are not limited to: account creation date and creator information; subscriber information including the email address(es), phone number(s), and billing information associated with the account; complete login-session history with timestamps and source IP addresses; the device-pairing history of the AirTag identified at ¶8 above, including initial pairing date, pairing-device identification, and any subsequent unpairing or re-pairing operations; the complete location-history dataset generated by the AirTag from the date of initial pairing forward; Family Sharing records identifying any Apple ID with which the account is grouped; any Find My network interactions during the surveillance period; and the complete record of administrative changes to the account.
16. Each of the Apple-held record categories at ¶15 above is preservable by subpoena to Apple, Inc. and is subject to retention under Apple's standard policies for so long as the account remains active and the data is within Apple's retention window. Each category is also subject to termination or alteration at the discretion of the party administratively controlling the iCloud account.

C. The May 4, 2026 Dead Man's Switch Facebook Post and Its Telemetry Payload

17. On May 4, 2026, a Facebook post was published from a Facebook account in Defendant's name, captioned "[SYSTEM ALERT] DEAD MAN'S SWITCH INITIATED," and naming five persons described as "responsible for my death": Defendant's witness Ann Helgren, Defendant's witness Pam Jordan, a former shared landlord (William Keene) against whom Plaintiff/Counter-Defendant had separately made an allegation in 2024, a Federal Bureau

of Prisons Correctional Officer (Jason Zielinski) against whom Plaintiff/Counter-Defendant had filed a complaint, and a residential neighbor (Michael Kamke) whom Defendant has never met.

18. The Facebook account from which the May 4, 2026 post was published was compromised. Defendant did not author, transmit, authorize, or have any role in the publication of the post. Defendant is alive, was alive on May 4, 2026, and remains alive at the time of filing this Supplement.
19. The May 4, 2026 post included a "telemetry" block purporting to be data from a GPS tracking device worn by Defendant. The factual record now in Defendant's possession establishes that the telemetry block was, in substance, the location-history dataset generated by the Apple AirTag described at ¶¶8 through 14 above, repurposed as the payload for the falsified post.
20. The telemetry block included an annotation reading "STATIONARY OVERNIGHT" keyed to a Brookfield Drive address one street number off from Defendant's actual residence at 1690 Brookfield Drive. The one-digit-off address corresponds to a location at which Defendant's automobile parks overnight; the AirTag was in the wallet inside the automobile during the relevant period, which is the surveillance-vector explanation for the geographic data the post sought to attribute to a "worn GPS device." The data source is the AirTag; the device class represented in the post is a fabrication.
21. The last log entry in the telemetry block of the May 4, 2026 post corresponds to the residence address of DeAndre Connor, at which the wallet containing the AirTag currently sits and where it has been located since prior to the May 4, 2026 publication.

D. Cross-Platform Witness-Intimidation Infrastructure Building on the Telemetry Payload

22. Between May 5 and May 7, 2026, a Facebook account operating under the name "Demi-Jo Matthews" performed three operations that built on the May 4, 2026 Dead Man's Switch post:
 - a. The Demi-Jo Matthews account shared the May 4, 2026 post into the Michigan Missing Persons Alerts Facebook group (a public group of approximately 1,700 members), framing the post as concerning a person "missing for at least a month, pinging in Ann Arbor";
 - b. The Demi-Jo Matthews account commented on a public Facebook post by Defendant's witness Ann Helgren, dated April 24, 2026, with text reading "Is that right before you killed him?"; and
 - c. The Demi-Jo Matthews account was configured to block Ms. Helgren from viewing the account's content, an operational configuration that permitted the account to comment on Ms. Helgren's posts while concealing the account's identity from her.
23. On May 7, 2026, a third-party Facebook user (Matthew Angel Young) independently constructed a Google Maps overlay from the fabricated GPS coordinates contained in the May 4, 2026 Dead Man's Switch post. The Demi-Jo Matthews account interacted with that overlay and, on information and belief, posted within approximately sixteen hours prior to May 7, 2026 at 10:46 AM, linking a coordinate labeled "4288 Cloverlane Dr" to a real Mlive.com news story regarding a fire at that address, framing the linkage as evidence "that Conrad was killed at that location."

E. The May 9, 2026 Witness-Targeting Email Campaign Under a Family-Identifier Alias

24. On May 9, 2026, at 5:31 AM EDT and again at 6:06 AM EDT, two emails were transmitted

to Defendant's witness Ann Helgren from a Gmail address at ecigaretteslut@gmail.com, operating under the display name "Angeline M." The two emails developed the narrative that Defendant had "died horrifically in fire" and that Ms. Helgren was responsible.

25. The "Angeline" display name corresponds to the first name of Ms. Helgren's adult daughter. The use of a family-identifier as the display name on the harassment alias is, on the factual record before the Court, an attacker-knowledge signal: the operator of the ecigaretteslut@gmail.com address possessed family-identifier information specific to Ms. Helgren that is not publicly available, indicating an operator with personal knowledge of Ms. Helgren's family.
26. The ecigaretteslut@gmail.com account is held by Google LLC. Subscriber information, login-session history with source IP addresses, account creation records, recovery information, and connected-device records are preservable by subpoena to Google under MCR 2.305 and California UIDDA process, and are subject to retention under Google's standard policies.

F. Live Coordination Visible in the X (Formerly Twitter) Public Record

27. On May 8, 2026 at 19:45:18 UTC, the X account at @spuntpatrol (one of the sockpuppet accounts inventoried at Category T of the Second Supplement to Part One) published a broadcast tweet bearing tweet identifier 2052837253408280726. The broadcast tweet expanded a URL field pointing to a Facebook profile under Defendant's name. As of capture, the broadcast tweet had 861 views, 8 likes, and 6 retweets.
28. Three reply tweets to the broadcast tweet identified above appear in the X public record:
 - a. Tweet identifier 2052873275735253491, posted by an aligned third-party amplifier account (@BiancaWestfall) on May 8, 2026 at 22:08 UTC;
 - b. Tweet identifier 2053019730819314068, posted by an unaffiliated bystander account (@lordofsinatra) on May 9, 2026 at 07:50 UTC, containing the text "I don't understand"; and
 - c. Tweet identifier 2053054715122888881, posted by @spuntpatrol on May 9, 2026 at 10:09 UTC, containing the text "He's dead."
29. The "He's dead." reply exploited the unaffiliated bystander's good-faith confusion as the setup line, building on the May 4, 2026 Dead Man's Switch post and the Demi-Jo Matthews amplification described at ¶¶22-23 above.
30. The conversation-thread structure of the broadcast tweet identified at ¶27 auto-populates the @-mention chain of participants. Each of the three reply tweets identified at ¶28 carries @KiwiFarmsDotNet (X numeric user identifier 1397654962742644736) in its user_mentions entities. The KiwiFarms Twitter account was therefore a participant in the broadcast conversation structure.
31. Each of the X public-record items identified at ¶¶27 through 30 above is currently visible only because Plaintiff/Counter-Defendant has not yet deleted the underlying tweets or deactivated the sockpuppet accounts. Each item is subject to deletion or platform-level termination at any time.

III. AUTHORITY FOR ADDITIONAL PRESERVATION CATEGORIES

A. Michigan Stalking and Cyberstalking Statutes

32. The conduct described in Section II above is conduct that, in Defendant's submission, constitutes stalking within the meaning of MCL 750.411h. Specifically, MCL 750.411h(1)(d) defines "stalking" as "a willful course of conduct involving repeated or continuing harassment of another individual that would cause a reasonable individual to feel

terrorized, frightened, intimidated, threatened, harassed, or molested and that actually causes the victim to feel terrorized, frightened, intimidated, threatened, harassed, or molested."

33. The conduct described in Section II above includes conduct that constitutes "posting a message" within the meaning of MCL 750.411s. Specifically, MCL 750.411s(1)(a) defines the offense to include the posting of a message through the use of any medium of communication, including a computer or computer network or telecommunications network, with the intent that the message be used to cause the victim, or a member of the victim's family or household, to feel terrorized, frightened, intimidated, threatened, harassed, or molested.
34. Defendant does not request that this Court adjudicate the criminal-law question of whether the conduct constitutes a stalking offense; that determination lies with the prosecuting agencies to which the conduct has been reported, including Redford Police Department Case No. 26-7649 (assigned to Co-Response Clinician Sonia McCain). Defendant references the statutes for the limited purpose of establishing the discovery-relevance of the categories of evidence requested for preservation: the records identified in Sections II.A through II.F are the records that would be material to any forum, civil or administrative, in which the cyberstalking conduct is the subject of inquiry, including Defendant's deemed-admitted Counterclaim in this proceeding (specifically the harassment-pattern allegations underlying Counterclaim Count H sanctions analysis).

B. MCR 2.310 and the Duty to Preserve

35. MCR 2.310 authorizes the Court to enter orders necessary to preserve documents and tangible things material to discovery. The duty to preserve evidence material to litigation arises independently of any court order at the point at which a party reasonably anticipates litigation. *Brenner v. Kolk*, 226 Mich. App. 149, 162 (1997).

C. Spoliation Doctrine

36. The spoliation doctrine in Michigan, articulated in *Teel v. Meredith*, 284 Mich. App. 412, 420 (2009), provides that when a party destroys, alters, conceals, or fails to preserve evidence material to litigation, the trial court may impose sanctions including an adverse-inference instruction, exclusion of evidence, or other relief commensurate with the prejudice. Where, as here, the categories of evidence at issue exist in third-party platform records whose retention is limited and whose operator-side termination is at the unilateral discretion of the party against whom the evidence would be deployed, the prospective preservation order is the appropriate remedy.

IV. ADDITIONAL PRESERVATION CATEGORIES

37. Defendant requests that the Preservation Order entered on the Original Omnibus, as previously supplemented, be further supplemented to add the following additional categories:

Category U: Apple, Inc. iCloud Records for conrad@cannabytes.net

- a. All records associated with the iCloud account at conrad@cannabytes.net, including account-creation records, subscriber information, login-session history with source IP addresses, recovery contact information, device-pairing history, Family Sharing records, billing records, administrative-change records, and any data products generated by paired devices and stored in the account, including but not limited to AirTag location history.

Category V: Apple AirTag Pairing, Registration, Location-History, and Anti-Stalking Notification Records

b. All records of the Apple AirTag identified at ¶8 above, including (i) pairing records from the AirTag's initial pairing date forward, including initial pairing-device identification, the iCloud account to which it was paired, and any subsequent unpairing, re-pairing, or transfer-of-ownership operations; (ii) registration records; (iii) location-history records from the AirTag's initial activation forward, encompassing the period of Defendant's pre-incarceration use, the period of Defendant's incarceration during which the wallet was in Plaintiff/Counter-Defendant's physical custody, and the post-release period from March 2, 2026 forward; (iv) any record of operator-side commands transmitted to the AirTag, including any "Lost Mode" activations, sound activations, or item-share operations; and (v) the Apple-system anti-stalking notification records generated by Apple's Find My network in response to the AirTag's continuous proximity to Defendant's iPhone and to third-party iPhones in Defendant's vicinity, including the notifications received on Defendant's iPhone bearing text reading "Unknown Accessory Detected" or substantially equivalent text and the corresponding notifications received on Ms. Helgren's iPhone.

Category W: Google LLC Records for ecigaretteslut@gmail.com

c. All records associated with the Google account at ecigaretteslut@gmail.com operating under the display name "Angeline M," including subscriber information, account-creation records, login-session history with source IP addresses, recovery contact information, content of emails sent and received, attachment records, contacts, account-settings change history, and connected-device records.

Category X: Meta Platforms, Inc. Records for Facebook Accounts Operated by Plaintiff/Counter-Defendant

d. All records associated with each of the following Facebook accounts, including subscriber information, account-creation records, login-session history with source IP addresses, content of posts and comments (including content posted into the Michigan Missing Persons Alerts Facebook group and content posted to Defendant's witness Ann Helgren's Facebook account), account-block configuration records, friends list, group memberships, account-settings change history, and connected-device records:

(i) The Facebook account operating under the name "Demi-Jo Matthews" and accessible at the profile path <https://www.facebook.com/amanda.berman.376> (Facebook numeric user identifier 100003851214028);

(ii) The Facebook account operating under the name "Sherri Adair" that posted the comment described at ¶14(c) above on Ms. Helgren's Facebook account on or about March 30, 2026;

(iii) The Facebook account operating under the name "Jenn Reede" that posted the reply comment described at ¶14(c) above on Ms. Helgren's Facebook account on or about March 31, 2026; and

(iv) Any additional Facebook account that, on records produced under this category, can be identified as operationally controlled by Plaintiff/Counter-Defendant on the basis of login-IP correlation, recovery-information overlap, or other common-control indicia.

Category Y: X Corp. Records for Broadcast Tweet 2052837253408280726 and Related Conversation Thread

e. All records associated with the broadcast tweet identifier 2052837253408280726 and the reply tweets identified at ¶28 above, including the underlying tweet content (including any deleted content within the platform's recovery window), all metadata fields (timestamp, source application, user_mentions entities, urls entities, in_reply_to_status_id), account login-session history for the @spuntpatrol account during the broadcast and reply period, and all DM conversations between the @spuntpatrol account and the @BiancaWestfall,

@lordofsinatra, and @KiwiFarmsDotNet accounts during the period from April 1, 2026, forward.

38. Categories U through Y above are added to and incorporated by reference into the preservation request originally made in Part One of the Original Omnibus Motion, as previously supplemented. The duty to preserve under *Brenner v. Kolk* is reaffirmed as to Plaintiff/Counter-Defendant with respect to each of the categories identified above.

V. RELIEF REQUESTED

WHEREFORE, Defendant/Counter-Plaintiff Conrad Alan Rockenhaus respectfully requests that this Honorable Court enter an Order:

39. Granting this Third Supplement to Part One of the Original Omnibus Motion;
40. Adding Categories U through Y to the Preservation Order requested by Part One of the Original Omnibus Motion, as previously supplemented;
41. Directing Plaintiff/Counter-Defendant to preserve, in their current form and without alteration, deletion, deactivation, transfer, or impairment, all of the additional categories of evidence identified at ¶37 above;
42. Reciting, in the Order entered, that the categories of evidence preserved are material to the deemed-admitted record on the Counterclaim and to any subsequent damages and equitable-relief determination, and that violation of the Order may result in (a) civil contempt under MCL 600.1701; (b) an adverse-inference instruction pursuant to *Teel v. Meredith*, 284 Mich. App. 412 (2009); (c) exclusion of evidence; and (d) monetary sanctions including reasonable attorney fees and costs; and
43. Granting such other and further relief as this Court deems just and equitable.

Respectfully submitted,

/s/ Conrad A. Rockenhaus

Conrad Alan Rockenhaus, Defendant/Counter-Plaintiff Pro Se

VERIFICATION

I, Conrad Alan Rockenhaus, declare under penalty of perjury that I have read the foregoing Defendant/Counter-Plaintiff's Third Supplement to Omnibus Motion Part One Concerning Apple AirTag Cyberstalking, Compromised iCloud Account, and Cross-Platform Witness-Intimidation Infrastructure, that the factual statements contained in Section II thereof are true and correct to the best of my knowledge, information, and belief, and that the matters stated upon information and belief are believed to be true.

/s/ Conrad A. Rockenhaus

Conrad Alan Rockenhaus

Dated: May 12, 2026

CERTIFICATE OF SERVICE

I, Conrad Alan Rockenhaus, hereby certify under MCR 1.109(D)(3) that on May 12, 2026, I served a true and correct copy of the foregoing Defendant/Counter-Plaintiff's Third Supplement to Omnibus Motion Part One upon counsel of record for Plaintiff/Counter-Defendant by the following methods:

By electronic mail to:

Lisa Baker, Esq. (P82555)
Aldrich Legal Services, PLLC
lisabaker@aldrichlegalservices.com

Kristen Sinkiewicz
Aldrich Legal Services, PLLC
kris@aldrichlegalservices.com

By First-Class U.S. Mail, postage prepaid, addressed to:

Lisa Baker, Esq. (P82555)
Aldrich Legal Services, PLLC
276 South Union Street
Plymouth, Michigan 48170

The undersigned declares that the foregoing statements are true to the best of his knowledge, information, and belief.

/s/ Conrad A. Rockenhaus
