

STATE OF MICHIGAN
IN THE THIRD JUDICIAL CIRCUIT FOR THE COUNTY OF WAYNE
FAMILY DIVISION, DOMESTIC RELATIONS

ADRIENNE MARJORIE ROCKENHAUS,
Plaintiff/Counter-Defendant,

v.

CONRAD ALAN ROCKENHAUS,
Defendant/Counter-Plaintiff.

Case No. **26-104594-DO**

Hon. **Nicole N. Goodson**

**DEFENDANT/COUNTER-PLAINTIFF'S SUBSTANTIVE SUPPLEMENT TO
EMERGENCY MOTION FOR PRESERVATION ORDER AND ORDER PROHIBITING
SPOILIATION OF EVIDENCE**

NOW COMES Defendant/Counter-Plaintiff Conrad Alan Rockenhaus, appearing pro se, and respectfully submits this Substantive Supplement to his Emergency Motion for Preservation Order and Order Prohibiting Spoliation of Evidence filed May 13, 2026, to document the post-filing course of conduct that has continued and escalated in the days following the Emergency Motion's submission. The factual record set forth below is independent of the May 12, 2026 Scrape Evidence corpus identified in the Chain of Custody Supplement filed contemporaneously with the Emergency Motion on May 13, 2026, and provides additional and independent support for the substantive preservation relief requested. In support, Defendant states as follows.

INTRODUCTION

This Supplement addresses four post-filing developments that, together, demonstrate that the conduct giving rise to the Emergency Motion has not ceased but has continued and escalated in the days since the Motion was filed:

First, on the evening of May 13, 2026, within approximately three hours of the CCApps portal's acceptance of the Emergency Motion, an account on the Meta Threads platform bearing the handle conrad.rockenhaus and displaying as Defendant (with Defendant's profile photograph, profile URL, biographical information, and a link to Defendant's premarital domain rockenhaus.com) sent a friend request to witness Ann Helgren. The conrad.rockenhaus account is Defendant's former Threads account, tied to an Instagram account Defendant created. Plaintiff has had administrative control of the credentials since the digital-account compromise described at paragraphs 44 and 50 of the Counterclaim filed April 15, 2026. Defendant did not authorize, send, or have advance knowledge of the friend request. The use of a compromised account that displays as Defendant to make contact with the most-evidenced witness in the file, three hours after Defendant's substantive filing, is identity impersonation in the service of witness contact, and is structurally independent of the platform-resident preservation issues underlying the Emergency Motion.

Second, a reaction-window scrape of the social-media network catalogued in the May 12, 2026 Scrape Evidence corpus, conducted in the early-morning hours of May 14, 2026 immediately following Defendant's May 13, 2026 filings, captures continuing public-record activity across the same accounts and identifies an additional account, bearing the handle @lifelessAI, that is propagating the false-injury narrative published in the May 4, 2026 "Dead Man's Switch" Facebook post described at paragraphs 84 through 85 of the

Counterclaim. The network has not gone dormant.

Third, Redford Township Police Department Case Number 26-7649, opened May 5, 2026 by Officer Young 192 following a walk-in by Defendant accompanied by witnesses Ann Helgren and Pamela Jordan, and assigned for follow-up to Co-Response Clinician Sonia McCain (smccain@redfordpd.org), is an independent law-enforcement record corroborating the period during which Plaintiff was absent from her residence at 26695 Ross Drive and during which Defendant's witnesses presented concerns regarding Plaintiff's safety and whereabouts to law enforcement. Officer McCain has prior contact with this matter and, in March 2026, communicated directly with Plaintiff in writing confirming verbal-only service of the Personal Protection Order. RPD Case 26-7649 places the period of network silence and residence vacation pleaded in the Emergency Motion within an independent law-enforcement-record framework.

Fourth, the third-party service path to Plaintiff directly at her email address of record adrienne@cannabytes.net was confirmed operational on May 6, 2026 through two independent third-party transmissions effected by Brian Howell from accounts brianhowell1980svc@gmail.com and bhowellsvc@icloud.com, neither of which produced a bounce. The confirmed direct-service path is procedurally relevant to the preservation order because any preservation directive entered by this Court can be served on Plaintiff directly via that path following the Court's anticipated ruling on Aldrich Legal Services, PLLC's pending Motion to Withdraw as Counsel.

The Court's May 14, 2026 Order Denying the emergency framing of the Emergency Motion did not address the substantive preservation merits, but rather directed Defendant to renew the relief through ordinary motion procedures. Defendant submitted the required ePraeipce at 16:45 UTC on May 14, 2026 and is awaiting calendar assignment. This Supplement provides the factual record on which Defendant respectfully requests entry of the substantive preservation relief sought in the underlying Motion. The cumulative record now warrants ruling on the preservation merits.

I. PROCEDURAL POSTURE

1. On May 13, 2026, between approximately 12:26 UTC and 18:48 UTC, Defendant filed via the CCApps portal three documents in this matter: (a) Notice of Withdrawal of Motion for Change of Venue, (b) Chain of Custody Supplement documenting the May 12, 2026 Scrape Evidence corpus, and (c) Emergency Motion for Preservation Order and Order Prohibiting Spoliation of Evidence.
2. The Chain of Custody Supplement was accepted by CCApps as a Pleading at approximately 14:22 EDT on May 13, 2026. The Emergency Motion was accepted by CCApps at approximately 14:27 EDT on May 13, 2026.
3. On May 14, 2026 at approximately 16:29 UTC, the Court transmitted, via chambers email, an Order Denying Defendant's Emergency Motion for Preservation Order as to its emergency framing only, with the underlying Motion continuing to pend on the Court's regular docket. The Order directed Defendant to submit an ePraeipce via <https://www.3rdcc.org/efiling/praeipce> for ordinary non-emergency scheduling via Zoom, to serve the Motion and Order on counsel of record for Plaintiff, and to file a Proof of Service with the Wayne County Clerk pursuant to MCR 2.107 and MCR 2.119.
4. Defendant submitted the required ePraeipce via the CCApps portal at approximately 16:45 UTC on May 14, 2026. The ePraeipce is in submitted-for-review status; calendar assignment is awaited.
5. This Supplement is filed pursuant to MCR 2.119(B) to supplement the factual record on which the underlying Motion is to be decided. The Supplement does not seek emergency relief and does not require emergency calendar treatment. The factual matters set forth below are post-filing developments that have come into Defendant's possession or attention after the original Motion was prepared and filed.

II. POST-FILING WITNESS-TARGETING VIA IDENTITY IMPERSONATION ON META THREADS

A. The Friend Request

6. On the evening of May 13, 2026, within approximately three hours of the CCApps portal's acceptance of the Emergency Motion at 14:27 EDT, a user account on the Meta Threads platform bearing the handle conrad.rockenhaus sent a friend request to witness Ann Helgren via her Threads account.
7. The conrad.rockenhaus account displayed to Ms. Helgren as if originating from Defendant. The profile photograph is a photograph of Defendant. The profile URL incorporates Defendant's name. The biographical text identifies the account as belonging to Defendant. The profile includes a clickable link to Defendant's premarital domain rockenhaus.com.
8. Ms. Helgren contacted Defendant by telephone the same evening to report the friend request and to confirm whether the contact had originated from Defendant. Defendant confirmed to Ms. Helgren that the contact had not originated from him.
9. The conrad.rockenhaus Meta Threads account is Defendant's former Threads account, tied to an Instagram account that Defendant created during the marriage and that Defendant has not had administrative access to since the digital-account compromise described at paragraphs 44 and 50 of the Counterclaim. Plaintiff has had administrative control of the credentials to that Instagram account, and thereby of the linked Threads account, since at least early February 2026.
10. Defendant did not send the friend request to Ms. Helgren. Defendant did not authorize any other person to send the friend request on his behalf. Defendant did not have advance knowledge of the friend request and learned of it only when Ms. Helgren contacted him to inquire. Defendant has no operative administrative access to the conrad.rockenhaus Threads account or the linked Instagram account through which the request was sent.
11. Ms. Helgren did not accept the friend request. Ms. Helgren preserved screenshots of the friend request notification, the profile page, and the request-pending state, with timestamps and device-of-receipt metadata. The screenshots are preserved in Defendant's evidence custody chain and are available for in camera review or production subject to a protective order, as the Court directs.

B. The Operational Significance

12. Ms. Helgren is the most-evidenced witness in this matter. Ms. Helgren has a sworn affidavit on the record in the related Personal Protection Order matter (Wayne PPO Case No. 26-102221-PP, Exhibit 15, notarized April 24, 2026 by Candace Bowie) corroborating Plaintiff's March 2, 2026 false statements to the Redford Township Police Department regarding Defendant's residency at 26695 Ross Drive, and corroborating Plaintiff's solicitation of false statements to the Veterans Administration regarding Defendant's mental health status. Ms. Helgren is the only witness named in the May 4, 2026 "Dead Man's Switch" Facebook post described at paragraphs 84 through 85 of the Counterclaim. Ms. Helgren is the witness who walked into the Redford Township Police Department with Defendant on May 5, 2026 in connection with RPD Case 26-7649 described in Section IV below.
13. A communication to Ms. Helgren that appears on her own device as originating from Defendant is structurally positioned to produce one or more of the following effects, each harmful to Defendant's interest in this proceeding:
 - a. **Information elicitation.** Ms. Helgren may share with the person she believes to be Defendant information regarding Defendant's litigation strategy, witness coordination, or evidentiary holdings that she would not share with Plaintiff or with third parties.
 - b. **Manipulated communication record.** A back-and-forth exchange initiated by the impersonating account may later be produced in adversarial proceedings as a record of Defendant initiating contact with Ms. Helgren in violation of the Personal Protection Order entered against Defendant, of professional standards governing witness contact, or of any settlement or stay-away framework that the Court enters in this matter.
 - c. **Examination trap.** Ms. Helgren may be confronted on cross-examination, deposition, or affidavit with the

question, "Mr. Rockenhaus reached out to you on the evening of May 13, 2026 via Meta Threads, isn't that true?" The truthful answer (yes, she received a friend request from an account displaying as Mr. Rockenhaus) would be misleading to the trier of fact absent disclosure of the impersonation, and the impersonation cannot be disclosed without preservation of the digital evidence currently in Plaintiff's exclusive control.

14. Each of the foregoing harms depends on the preservation of the underlying digital evidence: the account credentials, the access logs, the friend-request transaction record, the device-of-origination metadata, and the account-recovery history. All of this evidence is within Plaintiff's exclusive control or within the records of Meta Platforms, Inc. Without a preservation order issued by this Court directed to Plaintiff and supported by a separate preservation letter to Meta Platforms, Inc., the evidence is subject to spoliation either by Plaintiff's deletion of the account, by her credential rotation, or by Meta's ordinary retention-window expiration.

C. The Conduct Is Continuing, Not Historical

15. The Emergency Motion as filed on May 13, 2026 addressed the May 12, 2026 Scrape Evidence corpus and the conduct documented therein as historical record. The Meta Threads friend request, occurring three hours after CCApps acceptance of the Emergency Motion, is conduct continuing into and beyond the moment of filing. The May 13, 2026 friend request is a discrete actus reus with a fresh date for limitations purposes and for spoliation-doctrine purposes. The Court is not addressing past conduct alone; the Court is addressing an ongoing pattern of conduct that has continued during the pendency of the Motion.

III. CONTINUED SOCKPUPPET NETWORK ACTIVITY POST-FILING

A. The May 14, 2026 Reaction-Window Scrape

16. Defendant conducted a reaction-window scrape capture of the social-media accounts catalogued in the May 12, 2026 Scrape Evidence corpus in the early-morning hours of May 14, 2026, beginning shortly after the CCApps acceptance of the Chain of Custody Supplement and Emergency Motion on May 13, 2026. The May 14, 2026 capture (the "May 14 Reaction-Window Scrape") is preserved with SHA-256 cryptographic hashes consistent with the protocols documented in the Chain of Custody Supplement.
17. The May 14 Reaction-Window Scrape captures continuing public-record activity across the same network of accounts catalogued at paragraphs 64 through 67 of the Counterclaim. The captured activity establishes that the network has not gone dormant since Plaintiff's @adezero account ceased posting on April 11, 2026; rather, the network continued to operate around Plaintiff's silence and now exhibits identifiable reaction patterns in the post-filing window.

B. The @lifelessAI Account

18. The May 14 Reaction-Window Scrape identified an additional account bearing the handle @lifelessAI. The @lifelessAI account propagates the false-injury narrative published in the May 4, 2026 "Dead Man's Switch" Facebook post, described at paragraphs 84 through 85 of the Counterclaim, in which a post published from Defendant's compromised Facebook account named five persons (including Ms. Helgren) as "responsible" for Defendant's death. The propagation of that narrative through @lifelessAI is post-Emergency-Motion conduct and extends the witness-targeting and false-death-narrative course of conduct pleaded in the Counterclaim and the Emergency Motion.

C. The Montano Accounts

19. The Richard Montano accounts (@GordoMingYin and @OvenBenjamin), characterized in Defendant's evidence record as Plaintiff's digital-household partner accounts and not as amplification sockpuppets, registered measurable activity changes in the post-May-13-filing window consistent with operational awareness of Defendant's filings. The reaction-window pattern is independent of the @adezero

account's continued silence and is itself evidence of an active, awake operational network in proximity to Plaintiff. The Montano accounts are not within Plaintiff's direct administrative control; they are operated by Richard Montano (sostaosunderground1@gmail.com and sierranevadasos@gmail.com), who joined Plaintiff's Google Family Group on February 17, 2026 (PPO Exhibit 19). The behavioral correlation between Plaintiff's filings and Montano-account activity is evidence of coordination but not, by itself, of Plaintiff's direct authorship.

D. The @rosebuttcheeks Reframe

20. The May 14 Reaction-Window Scrape, combined with surrounding analytical evidence, refines the operational characterization of the @rosebuttcheeks account previously catalogued at paragraph 67 of the Counterclaim. The @rosebuttcheeks account is more accurately characterized as Plaintiff's personal-consumption parallel account rather than as an arms-length supporter or as a standard amplification sockpuppet. The structural anomaly identified at paragraph 67 (the account replying to its own message at in_reply_to_username = "@rosebuttcheeks") is consistent with single-operator administration by Plaintiff of both her verified main @adezero account and the parallel-consumption @rosebuttcheeks account. The refined characterization strengthens, rather than weakens, the single-operator architecture conclusion at paragraph 77 of the Counterclaim and reinforces the basis for the preservation relief sought against accounts within Plaintiff's direct administrative control.

IV. INDEPENDENT LAW-ENFORCEMENT RECORD: RPD CASE 26-7649

21. On May 5, 2026, Defendant, accompanied by witnesses Ann Helgren and Pamela Jordan, walked into the Redford Township Police Department to report concerns regarding Plaintiff's safety and whereabouts. The walk-in followed multiple consecutive days during which Plaintiff had been observed to be absent from her residence at 26695 Ross Drive.
22. The walk-in was received by Officer Young 192, who opened Redford Township Police Department Case Number 26-7649. The case was assigned for follow-up to Officer Sonia McCain, Co-Response Clinician, at smccain@redfordpd.org.
23. Officer McCain has prior contact with this matter. In or about March 2026, Officer McCain communicated directly with Plaintiff in writing in connection with the related Personal Protection Order. That March 2026 communication confirmed verbal-only service of the Personal Protection Order on Defendant and is preserved in Defendant's evidentiary record in the PPO matter as part of the consolidated PPO Show Cause defense.
24. On May 6, 2026, Defendant transmitted to Officer McCain a filing packet including the Second Supplemental Motion in Support of Termination of PPO, the Motion to Compel Compliance with MCR 3.707(A)(2), and supporting exhibits documenting the May 4, 2026 "Dead Man's Switch" Facebook post and related witness-targeting conduct. The transmission framed the underlying concern as for Plaintiff's welfare.
25. RPD Case 26-7649 places the period of @adezero silence (post-April 11, 2026) and Plaintiff's residence vacation pattern within an independent law-enforcement-record framework. The case file documents Defendant's affirmative cooperation with law enforcement on the welfare-of-Plaintiff dimension of the matter and provides a contemporaneous record of the absence pattern that culminated in the May 9, 2026 loading of household property described at paragraphs 88 through 90 of the Counterclaim.

V. CONFIRMED THIRD-PARTY SERVICE PATH TO PLAINTIFF DIRECTLY

26. On May 6, 2026 at approximately 12:42 UTC and again at approximately 13:59 UTC, third-party service agent Brian Howell, acting on Defendant's authorization and pursuant to the order for alternative service entered in the related PPO matter, transmitted directly to Plaintiff at her email address of record adrienne@cannabytes.net a filing packet consisting of Defendant's Motion to Compel Compliance with

MCR 3.707(A)(2), Second Supplemental Motion in Support of Termination of PPO, and Notice of Updated Contact Information.

27. The transmissions originated from two independent third-party email accounts: brianhowell1980svc@gmail.com (at 12:42 UTC) and bhowellsvc@icloud.com (at 13:59 UTC). Neither transmission produced a delivery failure or bounce. Both deliveries are documented in the corresponding email-server records.
28. The May 6, 2026 deliveries establish that the direct-service path to Plaintiff via adrienne@cannabytes.net is operative as of May 6, 2026, notwithstanding Plaintiff's physical departure from the Ross Drive residence on or about May 9, 2026. The confirmed direct-service path is procedurally relevant to the preservation order because any preservation directive entered by this Court can be served on Plaintiff directly via that path following the Court's anticipated ruling on Aldrich Legal Services, PLLC's pending Motion to Withdraw as Counsel (scheduled for hearing May 20, 2026 at 9:15 AM via Zoom).

VI. THE CUMULATIVE RECORD WARRANTS PRESERVATION RELIEF UNDER NON-EMERGENCY STANDARDS

29. The Court's May 14, 2026 Order denied the emergency framing of the Emergency Motion but did not reach the substantive merits of the preservation relief requested. The Order directed Defendant to renew the request through ordinary calendar procedure, which Defendant has done.
30. Even under non-emergency standards, the cumulative factual record now before the Court establishes that preservation relief is warranted:
 - a. **Continuing conduct.** The course of conduct pleaded in the underlying Motion has not ceased. It has continued into and beyond the date of filing through the May 13, 2026 Meta Threads friend request, the May 14, 2026 Reaction-Window Scrape activity, the @lifelessAI account propagation, and the Montano accounts' post-filing reaction patterns.
 - b. **Specific spoliation risk.** Each element of the post-filing conduct depends on digital evidence within Plaintiff's or third-party platforms' exclusive control. The Meta Threads account credentials are within Plaintiff's direct administrative control and can be rotated, the account can be deleted, or the linked Instagram account can be deactivated, at Plaintiff's election and without notice. Twitter/X account data for the @lifelessAI, @rosebuttcheeks, and Montano accounts is subject to platform retention-window expiration and to account-holder deletion.
 - c. **Withdrawal of counsel.** Plaintiff's counsel has filed a Motion to Withdraw as Counsel, scheduled for hearing May 20, 2026 at 9:15 AM. Counsel's Verified Motion to Set Aside Default of Counterclaim, filed May 13, 2026, represents at Paragraph 17 that "[t]he attorney client relationship between Plaintiff/Counter-Defendant and Aldrich legal services has broken down entirely making it impossible for Aldrich Legal Services to respond to Defendant/Counter-Plaintiff's filings." The anticipated withdrawal of counsel removes the procedural restraint that the presence of counsel of record imposes on a party's individual conduct with respect to preservation obligations. Entry of a Court-issued preservation order before or contemporaneous with withdrawal preserves the formal preservation duty after counsel exits.
 - d. **Independent law-enforcement involvement.** RPD Case 26-7649, opened during the pendency of these proceedings on the welfare-of-Plaintiff dimension, places the broader pattern within a law-enforcement record framework and supports the urgency of judicial preservation action notwithstanding the denial of the emergency procedural framing.
 - e. **Confirmed direct-service path.** The May 6, 2026 Howell deliveries establish that the Court's preservation order can be served on Plaintiff directly at adrienne@cannabytes.net, eliminating any service-mechanic obstacle to enforcement of the order post-Aldrich-withdrawal.
31. The cumulative record warrants the substantive preservation relief sought in the underlying Motion, on

regular (non-emergency) calendar treatment.

VII. RELIEF REQUESTED

WHEREFORE, Defendant/Counter-Plaintiff respectfully requests that the Court, on the calendar date assigned to the underlying Emergency Motion for Preservation Order:

A. Enter the substantive preservation relief requested in the underlying Emergency Motion for Preservation Order filed May 13, 2026, on the basis of the factual record set forth in the original Motion, the Chain of Custody Supplement filed contemporaneously therewith, and this Supplement;

B. Specifically order Plaintiff/Counter-Defendant to immediately surrender administrative control of the conrad.rockenhaus Meta Threads account, the linked Instagram account, all associated credentials, recovery email addresses, recovery telephone numbers, and access tokens, to Defendant/Counter-Plaintiff, and to refrain from any further operation of any account, persona, or identifier representing or impersonating Defendant/Counter-Plaintiff on any platform; and order Plaintiff/Counter-Defendant to disclose under oath, within fourteen days of entry of the Court's Order, the identity and credentials of any other account she operates or has operated that displays Defendant's name, photograph, biographical information, or any other identifier of Defendant;

C. Specifically order Plaintiff/Counter-Defendant to refrain from deleting, deactivating, or modifying any account catalogued in the May 12, 2026 Scrape Evidence corpus or in the May 14, 2026 Reaction-Window Scrape, pending further order of this Court;

D. Specifically order Plaintiff/Counter-Defendant to refrain from any direct or indirect contact with witnesses Ann Helgren and Pamela Jordan, whether through accounts displaying as Plaintiff, through accounts displaying as Defendant, through accounts displaying as third parties, or through any other means, pending further order of this Court; and

E. Grant such further relief as the Court deems just and equitable.

Respectfully submitted,

/s/ Conrad A. Rockenhaus
